OUR PHILOSOPHY

We bring together the best of two worlds, combining the fun and reward of fine modelbuilding with the rapidly growing interest in prototype railroading, freight cars and structures in particular. The preservation of history in miniature.

ABOUT OUR KITS

We're concerned about the details - and not only prototype details. We design and manufacture our kits and parts to the highest possible standards. Our parts are designed to fit together and if they don't we remake the tooling before we release the kit. Molded in a light grey, easy to paint styrene (that reflects light, making even the smallest part easy to see) parts are crisp and virtually flash free. Spares are usually provided for those smaller parts that might get lost or damaged during assembly. Preformed grabirons made from phosphor bronze wire are included where applicable.

Illustrated step-by-step instructions are included. These include prototype history and a painting guide. To avoid confusion, each part is identified by its correct name, and is keyed to the instructions by a number engraved on the "runner" or by a printed layout.

Only minimal tools are required; modelers knife, small file, precision tweezers, and a small brush to apply liquid cement. Additionally, you will need either aerosol paint or an inexpensive airbrush.

So give us a try - we know that you will agree with many thousands of modelers like yourself that these are...

SUPER KITS JUST FOR THE FUN OF IT!!

AVAILABILITY

We manufacture our own tooling and do all of our plastic injection molding in-house along with our own printing and packaging. As a result, we can make what we want, when we want, without depending on anyone else for major components. Our policy is to have every item in this catalog in stock at all times. As of the date, this catalog was printed, every item was in stock and we had no backorders.

These items (except where noted) are available through distributors to your local hobby store. They are also available direct and through our secure website.

Manufacturers interested in using our parts in their kits, should contact us for manufacturer pricing.
